INFRABUILD PARTNERS

Engineering support that ships on time.

InfraBuild Partners helps teams launch, stabilize, and scale digital products with **development, DevOps, SRE, and data delivery**. This one-page overview is designed for clients who want a quick view of what we do and how we price it.

6
core engineering service lines

24/7
support mindset for critical systems

99.99%
reliability-first delivery approach

Fast
clear monthly pricing for easier client decisions

Service Overview & Pricing

Development Support — $599/month

Full-stack development across Java, Python, Node.js, Angular, and React. From feature builds to complex refactors, we write production-grade code that ships.

DevOps Support — $549/month

CI/CD pipelines, containerization (Docker/ECS/K8s), IaC with Terraform, GitLab/GitHub Actions automation. We make your deployments bulletproof.

SRE Support — $699/month

Monitoring (Prometheus, Grafana, Datadog), incident response, SLA management, and reliability engineering. We keep your systems running at 99.99%.

Data Engineering — $799/month

ETL/ELT pipelines, data warehousing, Spark, Airflow, dbt, and cloud-native data architectures. We turn raw data into business intelligence.

Data Analyst — $399/month

Business intelligence dashboards, SQL analytics, reporting automation, and data visualization with Tableau, Power BI, and Looker.

Interview Support — $249/each

One-on-one mock interviews, system design reviews, coding walkthroughs, and real-time technical coaching to help you land the role.

What clients get

- Hands-on engineering execution instead of generic consulting slides
- Clear scopes for delivery, modernization, automation, and reliability work
- Pricing that makes it easy to start with one service or scale into a larger engagement

Start the conversation

Use this brochure as a quick client-facing handout for conversations around infrastructure, observability, application delivery, and technical support retainers.
